

WARM WEATHER CROPS

Date: Sat. Feb. 13th, 2016 10:00 AM-12:00 PM

Everything you'll need to know about warm weather crops; which ones are best started indoors, or direct seeded into the ground. What fertilizers to use, what conditions each crop prefers, all the information for a productive growing season

Taught by advanced certified Master Gardener Rachel Ziesk, and brought to you in partnership with Common Ground School.
